3.2 - Contractors	80%	63% (58)	60%

ECTA's RC implementation is linked to SQAS.

SQAS is about Continuous Improvement, but:

- SQAS Scores of 90% and higher mean less opportunities for continuous improvement.
- Are scores of $\geq 95\%$ really reliable?
- **Scores** vs. **Contents**
- Requirements to score 100% against individual templates are obviously the correct way.
- Each Cefic member has its own responsibility
